INTRODUCTION

We see from history how easy it is for women to be left behind in many areas of society. There is a need to create or support enabling environments to ensure that more women and girls get into the crypto and blockchain space. Cryptocurrency and blockchain in general have evidently become disproportionately male dominated and should not be allowed to remain so. Awareness and education can help bring more gender diversity to the space enabling more women to become stakeholders in the industry as investors, developers, entrepreneurs etc.

Momcoin token aims to encourage more women into the crypto space so that no one is left behind as cryptocurrency becomes mainstream. Momcoin (MOM), is a token that everyone, especially women and girls, can relate with and use as a point of entry into the space. This project will also fund and support charities and NGOs that work in the areas of training and empowerment for women and girls around the world.

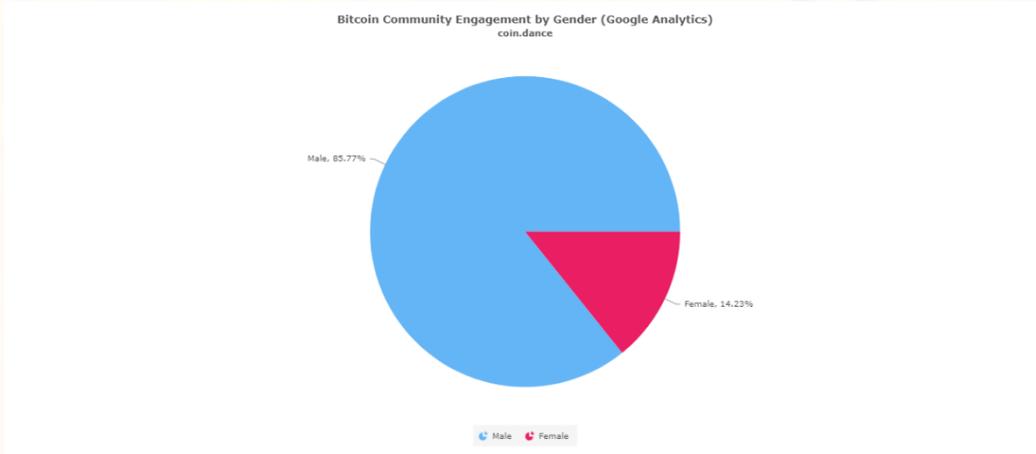

WHY MOMCOIN TOKEN?

Crypto and Blockchain Needs more Women in the space

One of the main benefits of cryptocurrency is that it is capable of bringing true economic empowerment and fairness to society. For the first time many people around the world who would not normally have access to invest and benefit from financial services are now investing in something they can feel that they truly have a stake in and at a level they would not have imagined. This new opportunity is a good thing but can only benefit those who participate.

Statistics currently show that cryptocurrency and blockchain space are overwhelmingly masculine and currently viewed as a “Bros club”. Although women are getting into the space the proportion is still unacceptable low. The Researcher Coin Dance reveals that there is 14.23% women engagement in the Bitcoin Community, and considering that there are hundreds of other altcoins and tokens the proportion of women engagement in the cryptocurrency community is probably less than that.

A Token We Can All Relate With

We believe that just as Non fungible tokens (NFTs) have served the purpose of bringing art and media into the blockchain and crypto space, some cryptocurrency tokens must serve the purpose of raising awareness and promoting the concept of economic fairness and encouraging more women and girls to get involved not only in technology as a whole but blockchain and cryptocurrency in particular. There are many entry points into the space, including as investors, developers and entrepreneurs, and women can bring a lot of variety into the space through participation. Momcoin (bearing mothers in mind) can become a token that everyone can relate with. Women and girls can be helped and encouraged to enter the crypto space using momcoin as an entry point.

The project will also support training and education of women and girls, especially trainings that can lead to more women in blockchain technology. Proceeds from the project will be distributed to Charities and NGOs working in women and girls’ education and empowerment through the Momcoin Grant. The benefiting organizations will be mainly nominated by the Momcoin community through the momcoin [website](#).

TOKEN INFORMATION

Momcoin token is a BEP20 token built on Binance Smart Chain (BSC) the world class blockchain ecosystem that powers many cryptocurrencies. The Smart Chain network is very reliable, has very low transaction fees and is arguably the fastest blockchain in the market.

Momcoin will be available on Decentralized exchanges and can safely be stored in Trust wallet, Metamask wallet and other wallets that are compliant with the BEP20 standard.

Momcoin has the coin ticker MOM. Total supply is 10,000,000,000.

Distribution:

5%, Developer, 5% The Team, 5% to Marketing, 10% to Locked in Reserve, 10% to Charities / NGOs, 65% Public sales.

Tokenomics:

There will be a 10% tax on all transaction which will be distributed as follows; 1% to Marketing, 5% holders, 3% Charities / NGO, 1% for liquidity.

How the raised funds are going to be used

Grant to Charities: The project will support training and education of women and girls, especially trainings that can lead to more women in blockchain technology. A minimum of 10% of initial supply of Momcoin will be distributed to Charities and NGOs working in women and girls' education and empowerment through the Momcoin Grant. The benefiting organizations will be mainly nominated by the Momcoin community through the momcoin website.

Marketing: A product is worthless if it is not properly marketed or promoted. Some of the proceeds will go towards marketing and promoting the Momcoin brand.

THE ROADMAP

2021

Q3 – Build website and start building community
